

The image features three olives in various positions: one at the top center, one to the right, and one partially submerged in a large, dynamic splash of olive oil that fills the lower half of the frame. The oil is a vibrant yellow-green color, with intricate patterns of ripples and droplets. The olives are dark green with a smooth, glossy texture.

Olivatis

An innovative range of delicate
surfactants and liquid crystals
emulsifiers based on olive oil.

MEDOLLA

Cosmetic Specialty Ingredients

An innovative range of delicate surfactants and liquid crystals emulsifiers based on olive oil.

Aivatis

- The origin of olive tree is lost in the dawn of time. Olive has been part of the history of medicine, herbalist medicine and Mediterranean cosmetics for thousands of years.
- Due to its composition, olive oil is very similar to sebum and therefore is able to restore the hydrolipidic film of skin.
- Olive oil fatty acids have emollient, restructuring and skin protective properties.
- Olive oil polyphenolic derivatives seize harmful free radicals and prevent the oxidation of cells.
- Olivatis can be considered as the “natural offsprings” of olive oil.

● Ingredients for toiletries formulations:

- **Aivatis 1** (Olive Oil Peg 7 Esters) Water soluble olive oil, with enriching properties and basically no dermal irritation degree.
- **Aivatis 2** (Sodium Peg 7 Olive Oil Carboxylate) Delicate primary surfactant, with excellent cleansing power and minimum dermal irritation degree.

● Liquid Crystals emulsifiers:

- **Aivatis 4** (Peg 4 Olivinate) Versatile O/W emulsifier that allows an easy formulation of stable emulsions with a pleasant touch and nice spreadability.
- **Aivatis 5** (Sorbitan Olivinate) “Peg free” W/O emulsifier that allows the formulation of very mild creams with a particular light touch.
- **Aivatis 6** (Cetearyl Glucoside, Sorbitan Olivinate) “Peg free” O/W emulsifier that allows to achieve stable emulsions with moisturizing and emollient properties and a pleasant light and silky sensation even when emulsions contain large amounts of oily substances.
