

Rapid 150 DeltaTech

Rapid 150 DeltaTech line – For demanding needs

Rapid 150 DeltaTech is the most dynamic product line within the 150-Series. With 7 different models and a wide range of standard options, each model can be tailor-made to each application. The following headlines are some highlights of the DeltaTech concept.

CleanGRIND Cutting technique

There are no shortcuts to the perfect regrind.

- Rapid has virtually perfected the art of processing high quality regrind. Consistent sized regrind with fewer fines that melts more uniformly. Recover your sprues without your production process and you'll feel the impact on the bottom line.

VersaGRIND Technology

- Specify the ideal granulator solution for your type and volume of plastic waste, granule size and recycling requirements. No compromises! Mix and match from Rapid's array of standardised options to create the granulator that exactly fits your application needs.

EasyCLEAN Engineering

- Easy cleaning and easy maintenance is fundamental demands for Rapid 150-Series. Instant access to all components provides easy cleaning when changing e.g. material or colours.

Cassette knife system

- No re-sharpening! No re-adjustments! Just remove the worn knives and replace them with new ones. The knife clearance between rotating- and stator knife will automatically be correct!
- Make sure that you easily and quickly can service your granulator for long lasting durability and top quality regrind.

Standard hopper

	150-21	150-35	150-42
A	490	630	700
B	270	340	375
C	500	640	710

Hopper standard, base high-built

	150-21	150-35	150-42
